Pupils With Disabilities Special Education VR Year-End (EOY) SIRS Reporting

Getting Started

The special education year-end reporting period requires exports from your student management and special education reporting systems. Cooperation between the CSE and CPSE committees, Registrar, District Data Coordinator (DDC), and PPS/building administrators is necessary to facilitate the upload, verification, and certification of the data within the established deadlines. Data is reviewed prior to certification in the PD Data System using PD Data System reports in combination with WYNRIC Level 1 and SIRS Level 2 reports.

Required Exports to Populate Year-End VR Reports in the PD Data System:

- **Demographics**
- **Enrollment**
- **Program Facts**:
  - Type of Disability
  - CEIS (5753) Voluntary allocation of IDEA funds (VR 16^)
  - CCEIS (5754) Required allocation of IDEA funds (VR 16^)

- **Special Education (SE) Year-End Snapshot for VR13**: Preschool special education programs and services provided any time during the school year. All public districts must upload am EOY Snapshot for VR13.
- **SE Events for VR11*, VR12* & VR14:** A chain of events that occur during the evaluation of a student. All public districts must upload Events for VR14.
- **Assessments for VR15*:** COSF scores (contained in the Early Childhood Outcomes Summary Form). Required only for districts identified for VR15.

PD System Reports Requiring Certification:

- **VR13 and VR14** certification is required for every public district
- ***These reports are required for public districts identified in the Schedule for Data Submission for State Performance Plan Federal Indicators
  - **VR11 = Indicator 11**
  - **VR12 = Indicator 12**
  - **VR15 = Indicator 7**
- **^VR16** is required only for districts identified for disproportionality or who have voluntarily budgeted up to 15% of federal IDEA funds to provide CEIS. Check your district's VR16 reporting status here

Data Due Dates:

- All demographic, enrollment, program fact, COSF assessment, and **SE Year-End Snapshot** data must be reported to Level 2 prior to the SIRS data repository locking in late August. Check the SEDCAR Table of Due Dates for more information
- **SE Events** capture data through August 31 and need to be updated after that date and prior to certification in September. **Only the SE Events** can be uploaded after the Level 2 repository locks in late August, so be sure that any corresponding demographics and enrollments are up before the repository closes.
