

# When to go to an Urgent Care Center

## Urgent Care is convenient care.

When a medical issue doesn't require an Emergency Room visit, or if you can't get in to see your physician, you can visit an Urgent Care Center and get the care you need.

- Shorter wait times
- Licensed professionals
- Convenient locations
- Extended and weekend hours

## If you are not sure where to go to get the care you need, contact your doctor.

He or she will be able to help you decide where to go. And remember to contact your doctor after getting urgent or emergency services for any follow-up care you may need.

Keep the number of your doctor and your nearest Urgent Care Center in an easy-access place, like your cell phone.
